WORKWEAR SINCE 1922

DICKIES®

RT WORTH TEXAS U.S.A.

A woman with dark hair, wearing a grey short-sleeved button-down shirt, dark blue jeans, and brown work boots, is sitting on a yellow metal barrel. She is looking down at a red work glove she is holding in her hands. The background is a blue-tinted industrial scene with various structures and pipes. The text "NOTHING ELSE WORKS LIKE DICKIES®" is overlaid in large white letters on the right side of the image.

DICKIES®

SKILLED WORKERS HAVE ALWAYS BEEN BUILDERS, shapers, and dreamers who forge their own path. These talented laborers wear their pride on their sleeves. And since 1922, more often than not, those sleeves have been on Dickies® workwear.

They're dedicated professionals who live to work and see the future as something that is theirs to make. And it's Dickies® workwear that gives them the freedom and comfort to do just that – allowing them to leave their mark on the world through their skill and dedication while their workwear proudly reps your company's brand and professionalism to the public.

For these doers, these shapers, these dreamers, and independent makers Dickies® workwear helps them project an air of confidence and personal style that is –

WORKTECH VENTILATED SHIRT

WITH COOLING PERFORMANCE MESH TECHNOLOGY

EVAPORATION PLUS AIRFLOW

Evaporation is our most effective way to lose heat, representing 75% of heat transport. To maximize cooling, we need a continual supply of fresh air. The Dickies® WorkTech shirt offers ventilation in key areas with breathable performance mesh, designed to bring in air and move heat away from the body.

MEASURING FOR PROPER FIT

The following guidelines are important in measuring for proper fit.

- Give all measurements in inches.
- If the person's measurements are between sizes, order the larger size.
For example: if a man's neck measures 15 $\frac{3}{4}$ " you should order size large in a short sleeve shirt or a 16-16 $\frac{1}{2}$ " in a long sleeve shirt.

- For greatest accuracy, have someone take measurements rather than allowing customers to measure themselves.
- The tape measure should be pulled snug, not tight.
- Check the size scale of all garments being ordered to ensure that all measurements were taken at the proper points.

MEN'S SHIRTS

- **NECK:** Measurement is the circumference of the neck as illustrated.
- **SLEEVE LENGTH:** Measured by placing one end of the tape at bottom of the collar at the center of the back and marking the distance around the elbow to bottom of the wrist. It is often helpful to have the arm slightly bent.
- **CHEST:** Taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. Hold tape level and firmly but not tight.

MEN'S TROUSERS, JEANS AND BIB OVERALLS

- **WAIST:** Measurement is taken at the top of the hipbone over shirt (not over pants). Tape should be held snug not tight.
- **INSEAM:** Measurement taken from base of the crotch to top of the shoe or boot. For jeans, add 1".
- It is advisable to ask the person being measured how he or she wears their trousers. Not everyone wears their trousers or jeans the same length or height on their hips.

JACKETS

- **CHEST SIZE:** Taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. Measurement should be taken over clothing, preferably over same garment or types of garments to be worn with the jacket.
- **SLEEVE LENGTH:** Measured by placing one end of the tape at the bottom of the collar at the center of the back and marking the distance around the elbow to the outer edge of the wrist.

WOMEN'S WEAR

- **CHEST:** Measurement is taken at the fullest point of the bust. Measure across shoulder blades with arms relaxed down at sides, keeping tape parallel to the floor. Hold tape level and firmly but not tight.
- **WAIST:** Measurement is taken around the natural waistline. Keep the measuring tape comfortably loose.
- **HIP:** Measurement is taken by standing with heels together. Keep tape straight and parallel to the floor, measure around the fullest part.

INDUSTRIAL WASH FRIENDLY

(HEAVY SOIL) This method of industrial laundering is commonly used to remove heavy soil with a combination of higher water temperature (160° F max) and harsher chemistry; pH should be held to 11.5 max. More aggressive wash formulas may be necessary to remove heavy soils but may result in accelerated color loss, deterioration in performance of retroreflective trim and overall reduced garment service life.

EXECUTIVE WASH FRIENDLY

(LIGHT SOIL) This less aggressive industrial laundering process is commonly used on garments which are lightly soiled or made of fabrics that are not designed to withstand higher wash temperatures or harsher chemistry. In a typical light soil formula, water temperatures are usually held to a maximum of 140° F and pH to 10.5 max.

FLEX

High-performance fabrics made with specialized polyester wrapped yarns for superior flexibility and exceptional abrasion resistance.
